**5 Steps - Helping you keep track of your children in school bus**
Features of the Smart Tracking System for School.

Parents can track School Bus from their Android or IOS based mobile phone.

5 Steps - Helping you keep track of your children in school bus.
Features of the Smart Tracking System for School.

Students swipe an RFID card over a reader installed on the bus, and their name, the date, location and time that they boarded and disembarked the bus is transferred to the School or bus company.

Automatic recording of the movements and locations of students including their tracking and monitoring in the school campus is easy with RFID technology. Come any emergency or requirement, they can be contacted fast and easily. RFID also facilitates teacher attendance.

GPS tracking technology is giving parents *peace of mind* – and helping kids stay safe – through a program that tracks school buses on their daily routes.

The device then delivers the data to the Track Your Vehicle hosted application, which you can access through our website at any time. You will receive real-time vehicle tracking updates, including location, direction, speed, idle time, start/stop and more, allowing you to manage a tighter schedule.

School bus GPS Tracking system
